Executive Summary

Goals:

We will realize our DApp ensuring earning for all holders of LX.

We will offer the first application dedicated to personal skills where it will be possible to spend time in a pleasant way and earn by winning the access costs of the rooms.

Providing access to every type of user on our platform.

Generating a constant capital to dedicate to the safeguard of the environment, looking for the applications in various sectors.

Methods:

We will use an algorithmic system creating our stablecoin LOG(L), with value 100L : 1\$

- The marketCap of LOG(L) will be linked to the to the M.C. of LOGX(LX). Acting as an underlying, every L token generated will increase the value of LX.

Developing the 5 most popular MiniGames from the web. The games will be totally based on skills.

- Games like Pool, Chess, Shooter, Car Racing, Minifootball. Creating Lobbies divided by Access Cost we will provide an unparalleled scalability of the system. The winner of the room will receive all the access costs (L) earned in it, deducting 1% in commission.
- The commission will be divided into more needs, one of which is the increase of the M.C. of LX.

Executive Summary

- NFT; Most of the earnings produced in NFT will be converted into LX liquidity, thus constantly increasing its value.
- An auction system for NFT buying and selling, which automatically increases the value by 10% compared to the initial purchase, will provide a further system of scalability of the platform.

We will create a valueless currency, FreeLog (FL). By playing matches using FL, the user will view promotional videos, which will generate capital in L to which the user will immediately have access. All profits generated from sponsorships will be converted to the user.

- Thus offering access to every player to the opportunities that the platform can reserve.
-
- Weekly tournaments to increase users. Every week the tournament room will be opened where every thousand players, there will be one winner who will receive all the access costs!
-
- Wheel of fortune, which users can spin once a day for free, trying to win the Jackpot prize, or part of it.

Executive Summary

Zero Impact. Will be the project dedicated to the environment. The project will be financed by 0.05% derived from each commission of all the matches that will be generated on our App.

Results:

By linking the MarketCap of L to that of LX, all the tokens that will be purchased to play inside the app, will provide a further increase of capital to LX.

Part of the commissions will go constantly to increase the liquidity of LX. Part of the NFT revenues will also be converted into LX liquidity.

We will exploit the advertising system to provide funds to users with more difficulties.

This mechanism will lead to a further production of Token L, which will increase the market cap of LX.

By applying the methods reported above, we will achieve the goal of a lasting and continuous flow of capital increase LX, and a unique platform of its kind, which can bring changes within the life of many users.

We will use the ZeroImpact project to combat climate change

Executive Summary

Conclusions:

- Best web games;
- Exponential scalability,
- Advertising system limited only to use;
- Automatic weekly tournaments with 1 winner EVERY 1000.
- Low and fixed commission at 1%
- 0.10% of the commission in Autostaking;
- 0.08% of the commission for the JACKPOT FUND.
- Uniting the capitalization of L with that of LX;
- Developing and dedicating the app to the Global market, and not only for the Crypto world;
- NFT with special facilities among which function as validator.
- Auction platform for NFT, with automatic increment to 10%.
- Making Simple and intuitive the use of every internal system of the platform;

Dedicating 0.05% to the construction of means dedicated to the safeguard of the environment

We will surely reach a considerable and constant increase of the capital of LX, rewarding all the coin holders, who have allowed the realization of the project.

- Providing on a global scale a means of entertainment and earnings with a unique scalability of its kind.

What is LOG

The Legacy Of Game platform will be a decentralized application.
The first true Play To Earn platform with a system based on players' skills.

Developed for accessibility and understanding of every user.
Dedicated to the global online gaming population.

- LOG will become a means of redistribution of goods.
- LOG will become a means for pure entertainment.
- LOG will become an ecosystem that self-sustains its user base.
- LOG will become a system for environmental requalification.
- LOG will fill the gap in the system that exists today.

Why LOG is Born

LOG is born from the web's need to associate gaming for entertainment with profit. For the lack of rewarding Skills.

To offer every person a unique scaling experience of its kind.

Unlike all existing PlayToEarns, the profit generated will be totally produced thanks to the actions of the players within the platform.

Each account will be a real wallet, where only the owner will have access.

Over time we have seen the construction of fascinating cryptographic systems, always with some lack.

We can see how in NFT card games there is a need to have luck or capital to own more cards.

We notice the scarce presence and even scarcer accessibility to tournaments where one could monetize their skills. Over time more and more people dedicate themselves to the experience of gaming, whatever type it may be.

We will try to fill the void in the system, combining leisure with profit, accompanied by many small facets that will make our platform unique.

What LOG will become

Legacy Of Game will become the first platform for skill games dedicated to the global community where it will be possible to profit on multiple fronts.

The platform will be developed with a simple interface, to be accessible to the global market that is not interested in cryptocurrencies.

With unique systems of earnings and NFT valuation, LOG will become the junction point between the useful and the enjoyable.

- LOG will be the war against monopolized gambling.
- LOG will be one of the most effective means for the redistribution of goods. LOG will give every user the opportunity to enjoy unique scalability.
- LOG will cede all revenues derived from ADS to users who have generated them. LOG will consistently recognize profits to all users who have purchased LX.
- LOG will provide a real meaning and way of using NFTS, with a unique auction system.
- LOG will permanently dedicate funds to the safeguard and restoration of the planet.

Private sell & I.D.O.

10% of the LX coins will be sold through PRIVATE SELL. At the price of 0.00028. We will start a promotional campaign explaining the project in all its key points. We will use the different social channels to disseminate the project.

Our ideology is to associate the quantity of LX coins with share quotas. At the right market moment, we will offer the first coins as a private pre-sale.

Subsequently,

-Another 10% of the coins will be sold through I.D.O. on different PAD platforms. Why buy LX in the pre-sale?

-We have set the structured idea with an algorithmic stablecoin, and by dedicating part of the internal game commissions to the increase of the market cap, to guarantee a correct and equitable increase in value of our native token LX.

-The platform will be dedicated and faced to the entire population that uses Online Games. Our goal is to publish the application in the PlayStore and in the different App platforms.

-Dedicating the application to a much larger market than that of cryptocurrencies. -Part of the revenues derived from NFTs will go into LX liquidity to increase its value. -The promotional videos displayed using the FL currency, will generate L Tokens as a reward for the viewing. Thus increasing the MarketCap of LX, and offering the opportunity to users to access the LOG-GAME, creating new matches with commissions and my increasing the capitalization of LX twice.

Private sell & I.D.O.

- The platform will be developed and created for the simple good taste of playing, spending time, and earning with one's own skills.
- Part of the commission of each match will be dedicated to the liquidity of LX, thus to a further increase in value.
- Using unique weekly tournaments in the world, where every week hundreds of thousands of people around the globe could win.
- The whole project has been studied to donate to the marketcap of LX a constant and lasting flow of increase, with a very high potential for increase. Thanking all the people who supported us in the development of this project.

Similarities

Skill games like Chess, Pool, Minifootball, Car Racing, and shoot-em-ups have literally conquered the web.

If we look at the amount of online matches played every minute around the world, for the simple pleasure of playing, we can notice very high numbers.

we want to associate this concept to a different concept than that of Gambling.

Ours is not a Gambling Game, it will be based only on your own skills, just like

many free online games!

We can take as an example games like AXIE INFINITY, NFT platforms with their own internal system, where the game sustains itself, based on playing time and on

luck have still been a hit on the web, achieving excellent results.

Did you know that 3.7 billion people in the world are gamers, only 10% of them are regular players.

About 50% of the planet, even if a little, plays.

We can think of an evolution of games, where gaming can bring profit without the ruin.

Games like CALL OF DUTY count well 520 million players.

Fifa 2022, has an average of 89 million matches played in the world.

The game of chess instead includes 70% of people in the world who know how to play.

Betting on one's own skills is a challenge that man has embraced since birth.

LOG GAME will be the first complete ecosystem that will give uniqueness in earnings and in entertainment.

Conclusion

Using the approach of multiple systems such as; -Best Online Skill MiniGames,

- Algorithmic StableCoin (L),
- Market cap LX linked to the flow of L,
- Increasing access costs for scalability,
- VideoPromo FreeLog(FL) for the generation of L,
- Weekly tournaments with thousands of users and only one winner, Wheel of fortune with Jackpot,
- Publishing on Store platforms,
- Autostaking system,
- NFT with purpose of use and purchase,
- Conversion of NFT profits into LX liquidity,
- Auction platform for the purchase and sale of NFT with automatic increment. We could offer a complete and unique platform, guaranteeing an increase in LX capital, rewarding all holders of the LXcoin.

Commission

Each match, at its end, will have a management commission. The winner of the room in fact will receive all the L coins used as access costs for the same room, subtracting 1% of the total. This percentage will be divided into more functionalities, offering a more complete experience in the platform, supporting management expenses and increasing the market cap of LX.

The commission cost will be divided into:

0.47% Blockchain & Team Fund Usage Cost.

0.30% LX(LOGX) Liquidity.

0.10% Autostaking LOG(L).

0.08% Jackpot.

0.05% 0 IMPACT Fund

Zero impact project

We have decided to dedicate 0.05% of the commission to a fund called ZERO Impact. This fund will be used as an investment for the safeguard of the planet.

It will be channeled into various sectors to support our planet. The main fields where Zero Impact will be dedicated are:

- Generation of electric energy -Cleaning of the planet
- Safeguarding glaciers

By dedicating a constant flow of revenue to the requalification of the planet, we will surely achieve excellent results.

NFT

Our platform will launch limited collections of exclusive NFTs! We will add special features to certain NFTS, or entire collections, that will benefit the user in aesthetic or figurative level areas on the platform. Our NFTs will also function as real validators, to further encourage purchase and use by users.

The profit of the NFTs will be converted into liquidity for LX.

In the LOG platform, there will be a dedicated section for buying and selling NFTs. These NFTs will be launched on the platform, where it will be possible to participate in an auction starting from a base price. Your NFTs can be resold on the auction platform, automatically setting the starting bid value at 10% more than the purchase value. Every user will be able to buy an NFT, and then resell it at auction to the highest bidder. 5% of the sale value will be converted into commissions, and thus into LX liquidity.

Similarities

Autostaking will be used as an incentive and reward for users, encouraging them to keep their L coins within the platform. All users with L coins will receive autostaking proceeds, proportional to the capital held. There won't be a specific function to lock coins in staking, but rather, automatically, all the app's wallets will function as validators. Every game on the platform has a 1% commission, of which 0.10% is dedicated to autostaking. Every player will earn, in proportion to their own L capital, from every single game played. This offers a continuous increase in the wallets of the users.

Key Point

We will offer free access to the app, as it will be structured in a simple and understandable way even for those who are not familiar with cryptocurrencies, by publishing it in various stores. We will offer the opportunity to generate your own L tokens, thanks to FREELOG (FL) which will be issued daily. We will offer the opportunity to buy the L Token in packages directly in the app. We will offer the opportunity to earn through your own skills, receiving the entire Access Cost of the current room minus 1%.

We will offer the opportunity to earn through Autostaking with your L coin, deriving profits from every game played by all users. We will offer the opportunity to earn by purchasing the LX (LOGX) token thanks to the joint capitalization of the two coins. We will offer the opportunity to earn by purchasing NFTs that will be created periodically, unique, by artists in the field, reselling them in the auction system with automatic increase. We will offer the opportunity to use a unique scalability of its kind. Exponentially, you will be able to double the capital staked, game by game. Achieving unimaginable results in a very short time. We will offer a constant percentage of each game to contribute to the requalification of the environment.

TokenoMlx

Total LX in circulation 8,800,000,000:

- 10% PrivateSELL (Unblockable 10%/month)
- 10% I.D.O. List (Unblockable 10%/month)
- 10% Team
- 25% PublicSell
- 45% BlockSystem token L.
- L: \$0.01 100L: \$1

The L token will be automatically generated and burned based on the needs of the algorithm's stability. For every purchase request, a quantity of L tokens equivalent to the requested purchase will be generated. [Purchase \$10 / Creation 1000L] For every sale request, liquidity will be provided and the quantity of L tokens burned to ensure the stability of the currency. [Sale \$10/ Burning 1000L]
